

INFOSECTRAIN

**WE CERTIFY**  
your expertise

# WHO Are we

Infosectrain is a leading provider of official IT training in all the budding IT technologies. Run by a group of dynamic and passionate professionals, Infosectrain aims to provide all inclusive internet solutions. Some of these include Microsoft, Oracle, Cisco, SAP, Adobe, iOS, Linux, Big Data and Citrix. Information Technology has seen a global rise and demand, so we ensure that our methodology of training is well suited for the global customer base. Our range of latest IT courses provided by our trainers has assisted professionals globally in achieving their vital business goals. The myriad courses and IT certifications are available under one roof and ensure that you get the much needed kick to boost your professional life. Infosectrain has set a benchmark for itself by providing IT certifications and training to the workforce of multiple Fortune 500 companies across the world. Our certifications serve to be a pioneer in establishing benchmarks of expertise that will help you get noticed professionally in this vast digital world apart from helping you lead in the IT domain.

# “ LEARNING Methods ”

Online training  
Onsite training

Topic centered training  
Job based training

## Online training

The Live Online Instructor Led Training of Infosectrain grants you the freedom to learn from the comfort of your home. A distinguishing feature of this training is that it allows weekends only and 4 hours a day training option.

## Features

- Certified experts
- Live training
- 24/7 availability
- Flexible timings and dates according to your needs
- Remote access to lab
- Session recording for future reference

## Onsite training

This model encompasses the following

Get Me a Trainer method of learning is crafted to cater to the requirements of corporate clients. This facility permits enterprises to have our professionals conduct trainings on their premises. A co-located data center is used for delivering labs.

- Customization of course content based on needs
- Best support in arranging the required classroom set-up
- Analysis of training needs in order to identify the best suited course for your team
- Evaluation post training in order to compute the ROI from training efforts

## Topic centered training

### Things you get

This methodology allows you to learn what you require, when you require.

- One on one consultation and training
- 100% money back guarantee
- Begin within 24 hours
- Online labs for hands on practice

## Job based training

### Some of these include
